Gray Gorge Natural Steps

Tennessee Natural Steps

Natural & Snapped Step / Treads

Take height of incline in inches divided by thickness of step / tread to get correct number of step treads needed for specific job; note that less incline (% of slope) requires deeper bed depth for step treads.

Example: A slope (hill) which is 72 inches high (6 feet) would require 12 pieces of 6" step/ treads (72 inches divided by 6 inches = 12 pieces)

Coverage may vary depending on field conditions & depth of stone used

Cut Step Treads Options

Canyon Gray Machine Cut Treads

Indiana Buff Cut Steps

Canyon Gray 2' Mini Cut Steps

Canyon Gray Cut Steps

Tennessee Brown or Gray Cut Steps

Blue River Cut Steps

Snapped/Split Steps
