Web Wall;

Random sizes hand sorted but not mechanically split. Bed depth is 3.0" – 4.5". Diameters vary and are installed bed face out, typically in a "Mosaic" pattern. A stone ledge of 6" is recommended on the footer / foundation. This is available in bulk or bagged product.

Coverage = Approximately 55 sq ft per ton + or -

Split Veneer – Full Bed Depth;

Random Heights determined by the seam thickness that occurs naturally in the quarry formation. This stone is then mechanically split to a 3.5" – 5.5" bed depth and sorted in random lengths. A stone ledge of 6" is recommended on the footer / foundation. This is available in bulk or bagged product.

Coverage = Approximately 40 sq ft per ton + or -
